"STUNG AGAIN!" SHIPLOAD OF SAYS TITUS. BEAUTY IS HERE

Chief of the Thief Catchers Colleens from Ireland, with Hair Goes to Capture a Cargo of Crooks, but He Is Successfully Foiled.

All the Sleuths from "No. 300" Waited on the Pier to Get "Good Men," but All They Landed Was One Forlorn Little "Gug."

"Just before the ship comes up to the pier Cap. Titus gathers his trusty men under the double O sign on the north side of the shed and says:

The Cap Tips 'Em Off. "Hark ye, lads. Aboard this good ship there are anywhere from a hundred to a thousand American crooks, coming back here to live in New York because they can't live on the other side. Do you understand?'

"Sure," says the cope "We can't allow them mugs to be at large in New York,' says Cap. Titus. 'If they'd get to work there wouldn't be anything doing for them that's stayed right at home and tended to business, instead of hiking off to France and England and Poland and cleaning up bankrolls that would block the rapidtransit tunnel. As fast as they come

off the ship, nail 'ern.' "'Aye, aye,' says the sleuths, taking a fresh grip on their handcuffs and testing the rubber heels on their shoes.

"'Keep you eye on him,' says Cap.

"Well, they took that guy into the cabin and buzzed him for fifteen minutes. He showed them that he has been keeping a pork store in Avenue A for the past fifteen years, and the worst that could be said of him was that he is a member of Tammany Hall.

Mugs Not True to Life,

"They held up a clothing man from Worcester and accused him of being Archie Maginals, that killed Freddle Edwards in Butte in a scrap over what they got from a sucker. Out of the 141 first-cabin passengers Sheridan identified 72 and every one proved an allbi, which goes to show that the Rogues' Gallery looks like any other photograph gallery, only the pictures ain t mounted. "But they did got one. The last mug off the ship is a little red-headed guy with a face you could crack nuts on. The entire bunch of sleuths closes in on him and nabs him. They all knew him, But he proved that he'd been over to Ireland burying his mother.

"Stung! says Capt. Titus. 'Stung again! Curses on the cards! I'm going to shake that fortune-teller!"

And Johnny Bull Fell, Too.

"But Titus wasn't the only sleuth that was stung. There was a Scotland Yard man on board trailing an English forger. When the Scotland Yard man came down the plank, following the man he had spotted, he runs up against Donohue, the special Treasury agent that butts into people on the plers to see if they're smuggling.

"The Scotland Yard man had three revolvers, five pairs of handcufts, a camera, a dark lantern, a sandbag, a complete set of ready disguises and a pair of galoshes in his oercoat pocket. Of course Donohue held him up for a smuggler. The holler the Scotland Yard man made could be heard across the river. He said his name was Finneran. When they let him loose the man he had trailed across the ocean was out of sight and he started out to pick up the trail. He had a good chance."
